

## Digital Storytelling

### Using MovieMaker

1. Import pictures or video OR use a video device to capture footage.
2. Import audio or music. You can pre-record audio using the sound recorder on your computer or you can narrate the movie using the timeline narration on moviemaker. (Timeline narration: TOOLS → NARRATE TIMELINE) **\*your computer needs to be equipped with a microphone**
3. Add a title (if desired).
4. Add transitions between clips to give the movie smooth transitions between clips (if desired).
5. Add narration (if desired). **\*your computer needs to be equipped with a microphone**
6. Now you can move items around such as the audio clips, picture/video clips, transitions; you can also cut clips to shorten or lengthen them.
7. Once you are satisfied with your movie, save the movie file.
8. You can upload your newly created movie to VoiceThread at [www.voicethread.com](http://www.voicethread.com) (if desired).

### Using Powerpoint

1. Upload pictures
2. Add text (if desired).
3. Add transitions (if desired).
4. Import audio or music. You will have to pre-record audio using the sound recorder on your computer. **\*your computer needs to be equipped with a microphone**
5. Once powerpoint is completed, you can upload it to VoiceThread at [www.voicethread.com](http://www.voicethread.com) (if desired).
